

A NEW ERA IN LABORATORY DATA MANAGEMENT

Merel Instruments Partners with IDIS Data Management Software

INTRODUCTION TO THE PARTNERSHIP

Advancing Laboratory Data Management Together

Merel Instruments, renowned for its high-quality laboratory solutions, is thrilled to announce a strategic partnership with Automated Lab Systems, aimed at enhancing our data management solutions using the IDIS Data Management Software, fully compliant to 21 CFR Part 11 regulations.

CAPABILITIES OF IDIS

Comprehensive Instrument Control with IDIS

IDIS software manages multiple applications including Tablet Dissolution, Content Uniformity, and Sample Processing across various disciplines such as Pharmaceutical, Food, and Environmental analysis. The system integrates over 130 types of instruments through advanced software drivers.

- Integration with high-end MySQL, Oracle and SQL Server
- Support for a broad array of lab equipment such as HPLC CDS, Spectrophotometers, Autosamplers, and more

BENEFITS OF THE PARTNERSHIP

Seamless Integration, Superior Management

- **Efficient Methodology:** Simplify processes with easy method writing capabilities.
- **Centralized Data Management:** Secure and centralize your data storage and management with Windows Active Directory Authentication.
- **Regulatory Compliance:** Ensure full compliance with 21 CFR Part 11 regulatory requirements.

Discover how these configurations can revolutionize your laboratory operations.

OPTIMAL CONFIGURATIONS FOR LABORATORIES

Tailored Solutions for Enhanced Efficiency

To kickstart our collaboration, we're focusing on delivering optimal system configurations tailored to modern laboratory needs, including the 708-DS and 850-DS dissolution systems, Cary 60 UV/Vis spectrophotometer, and the dissoBOT automation system.
